    P-16180

    The first and second position of the vinyl roof code indicate the type of grain (first position) and the color (second position)

    For example:
    HD under vinyl code (H) means the Grande grain Full Maroon/Red bright vinyl roof (D)

    In listing which follows the vinyl roof covers are arranged by body type and the vinyl roof Code as listed on the Certification table.

    The first and second position of the vinyl roof code indicate the type of grain (first position) and the color (second position)

    ## For example:

    HD under vinyl code $(H)$ means the Grande grain
    Full Maroon/Red bright vinyl roof (D)
    In listing which follows the vinyl roof covers are arranged by body type and the vinyl roof Code as listed on the Certification table.

    $$
    \text { P. } 16180
    $$

    The first and second position of the vinyl roof code indicate the type of grain (first position) and the color (second position)

    For example:
    HD under vinyl code ( $H$ ) means the Grande grain
    Full Maroon/Red bright vinyl roof(D)
    In listing which follows the vinyl roof covers are arranged by body type and the vinyl roof Code as listed on the Certification table.

    For your convenience the exterior moulding illustrations have been merged with the related text information to form a combined Exterior Moulding (text and illustrations) Section.

    This section includes moulding illustrations and part numbers information for Back End (luggage compartment, lower back panel, liftgate and tailgate), Body Side (standard, optional protection), Door Edge Guard, Tape Stripes and Roof and Back Belt areas of the vehicle.

    All retainer information (illustrations and part numbers) is shown in Exterior Moulding Section "R".

    Refer to indexes which precede each model year to determine the correct section and page number (or row and column number in your microtorm transparency).

    The Certification Label includes a three (3) digit code to identify the color and grain of the body side mouldings.

    For example: 84A black vinyl body side moulding

    Special tape stripe kit offered as district promotions or DSO are not cataloged. These vehicles are ordinarily identified with a decal on the glove box door indicating the supplier from whom the part may be ordered. In the event that the decal is missing, the customer should obtain the vehicle DSO number from the certification label and contact the Ford District Office (First two digits of the DSO number represent District I.D.)

    The Certification Label also includes a Tape Stripe color code referenced in this catalog under symbol " $\boldsymbol{\nabla}$ ". This numeric code, when present, will be found in the block/space designated for $A / C$ or Tape Stripe.

    ## EXTERIOR MOULDING SECTION

    For your convenience the exterior moulding illustration have been merged with the related text information to form a combined Exterior Moulding (text and illustrations) Section.

    This section includes moulding illustrations and part number information for Back End (luggage compartment, lower back panel, liftgate and tailgate), Body Side (standard, optional protection), Door Edge Guard, Tape Stripes and Root and Back Belt areas of the vehicle.

    All retainer information (illustrations and part numbers) is shown in Exterior Mouiding Section "R"
    Refer to indexes which precede each model year to determine the correct section and page number (or row and column number in your microform transparency).

    The Certification Label shown below includes a three (3) digit code to identity the color and grain of the body side mouldings.

    For example: 84 A black vinyl body side moulding.
    The Certification Label also includes a tape stripe color code referenced in this catalog under symbol " $\boldsymbol{\nabla}$ ". This numeric code, when present, will be found in the block/space designated for $\mathrm{A} / \mathrm{C}$ or tape stripe.

    Special tape stripe kit offered as district promotions or DSO are not cataloged. These vehicles are ordinarily identified with a decal on the glove box door indicating the supplier from whom the part may be ordered. In the event that the decal is missing, the customer should obtain the vehicle DSO number from the certification label and contact the Lincoln/Mercury District Office (first two digits of the DSO number represent district I.D.)
